

The Milwaukee City Center had a great turnout on August 20th, 2008 for the "Going Beyond Green Webinar." 19 participants enjoyed a lunch together during the program. A special thank you to our Host for this event, Direct Supply Inc., Milwaukee, WI for providing us with the conference location and audio visual assistance to provide this webinar. The designers present commented that they truly enjoyed the diversity of projects, the range of designs highlighted, and the discussions by both the project designers and the judges for the competition.
